

Katrina Denny

RPM Systems & Stations Project Manager

Chicago Transit Authority

Katrina Denny began her career at the Chicago Transit Authority (CTA) in the Technology department as a project engineer working on projects that upgraded station communications devices like cameras, train tracker signs, and public address speakers. She then transitioned to the Infrastructure department and worked as a project coordinator on capital improvement projects such as the Dan Ryan Track Renewal & Stations Improvement Project. Ms. Denny's next position was the CTA Project Manager 95th Terminal Improvement Project, a \$280M capital improvement project where the CTA transformed the aging redline station into a modern rail and bus transit terminal. She currently is working as the Systems & Stations Project Manager for the CTA's Red and Purple Modernization (RPM) Phase One Project.

Prior to her time at CTA, Ms. Denny worked at the German American Chamber of Commerce as a consultant promoting German-American business in the renewable energy, green architecture, and sustainability industries.

Ms. Denny holds a Bachelors in Engineering, with a Civil Engineering concentration. She also holds a German language major. Ms. Denny obtained her Professional Engineering license in 2017.
