

John Hopkins

Director, Infrastructure | Harrison Street

John is a Director on the infrastructure team at Harrison Street and leads many of the firm's renewable energy and energy transition investments. John is responsible for originating, structuring, financing, executing, and managing infrastructure assets. He also supports development of investment strategies and leads efforts to forge joint venture relationships with development and operating partners. John has supported over \$6 billion of projects throughout his career.

John's recent work at Harrison Street has included solar, battery storage, and utility scale wind investments. His sector experience includes various clean energy technologies along with district energy systems and water pipelines. Prior to joining Harrison Street in 2020, John was at a boutique financial advisory firm working with clients to structure and raise capital for energy infrastructure projects located in the Americas. Prior to that, John spent almost six years at GE Energy Financial Services where he led numerous renewable energy investments in the U.S. and Japan. John started his career at Goldman Sachs in their fixed income and equities divisions.

John holds a BA in Economics from Yale University.
