

Angela Lee

ACHA, EDAC, LEED AP

Principal

Role: Regional Managing Director – Asia Pacific

With several doctors in the family, Angela has always been comfortable in healthcare settings. When she decided on architecture as a profession, healthcare design seemed the obvious path. She knows that successful design is the result of the harmonious relationship and balance between the patient and user experience, form and function, budget and schedule, sustainability and sound business principles.

As managing director of Southeast Asia, Angela has 22 years of healthcare planning experience and participating in the design and planning of over 1.1 million square meters of healthcare projects worldwide. Her projects have been honored with design awards from both the AIA and Modern Healthcare. She has been recognized in publications such as Healthcare Design, Health Facilities Management, Healthcare Design Ideas and Medical Construction and Design.

Background

Bachelor of Architecture, University of Oklahoma

ACHA Board Certified Healthcare Architect

Evidence-Based Design Accreditation and Certification

LEED Accredited Professional

American College of Healthcare Architects
