Education

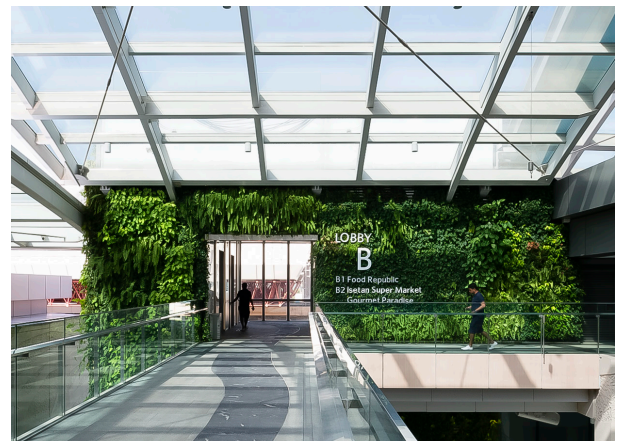

University of Melbourne
Bachelor of Planning & Design
Bachelor of Architecture (Honours)

Terminal 4 Changi Airport, Singapore

ION Orchard, Singapore

Westgate, Jurong, Singapore

Major Project Experience

Terminal 4 Changi Airport, Singapore

With Singapore's ever-expanding tourism industry, Changi Airport needed an innovative, practical solution. Tasked with designing a large-scale, modern terminal that could cater to millions of passengers, we developed exciting facilities and visually attractive interiors.

We blended simplicity and modernism to create bright, open spaces. Multiple glazed designs and lush greenery were incorporated to complement glass, metal and fine grain materials, while utilising natural light and colourful illuminations.

Accommodating up to 16 million passengers a year, Terminal 4 is a stunning development that redefines the travel experience. The impressive Central Galleria links departure, check-in, arrival and transit areas for a functional, fluid thoroughfare, while vibrant skylight lanterns and landscaped gardens take inspiration from Singapore's rich tapestry of urbanism and nature.

Subang Jaya City Centre, Selangor, Malaysia

To rejuvenate the Subang Jaya township of 700,000 residents, our client wanted to create a brand new retail and lifestyle opportunity. The designs had to centre around people and progress and develop a space that entices commercial industries, while celebrating Malaysia's natural beauty.

Covering more than 12 hectares, this development seamlessly integrates a multi-modal transport hub with a mix of retail, commercial and residential schemes. Our masterplan prescribes urban design strategies to create clean open spaces that are sustainable and safe.

Pluit City Mixed-Use Commercial District, Jakarta, Indonesia

Benoy has been commissioned by one of Indonesia's largest and most respected developers, Agung Podomoro Land to masterplan and design a site within their landmark waterfront city development, Pluit City.

Forming the gateway to the iconic 160 hectare modern bayfront island, the Pluit City Cultural Village will offer contemporary world-class entertainment and retail offerings within an urban network of laneways, plazas and social nodes – all inspired by the traditional Chinese shophouse. Only 20km from Jakarta's international airport, the 125,000sqm development will consist of a 350-room Hotel, Office Suites, a 4 level Retail Mall, F&B, Speciality Retail and Pluit City's own Marketing Gallery. The shophouse inspired architecture will be a modern and contemporary interpretation of traditional Chinese elements, creating a unique and attractive destination for the Pluit area.

Subang Jaya City Centre, Selangor, Malaysia

Pluit City Mixed-Use Commercial District, Jakarta, Indonesia

Kuala Lumpur International Airport Satellite Building Commercial Reset, Kuala Lumpur, Malaysia

Malaysia Airports Holding Berhad implemented a commercial reset and passenger experience improvement program across its Kuala Lumpur International Airport.

As part of the reset, a feasibility concept was completed for the iconic Satellite Building to upgrade commercial offerings and enhance wayfinding.

Wiraland Southcity Masterplan, Jakarta, Indonesia

A fifty-two hectare mixed use masterplan located in Pondok Cabe, south of Jakarta. The masterplan consists of a number of high density residential components, a central business district and a retail+ leisure commercial hub. Taking advantage of the site's naturally undulating topography and valleys, the various precincts are designed to prioritise privacy while maintaining unobstructed views to landscape & water.

Selected Project Experience

Aviation

Changi Airport Terminal 4, Singapore
Changi Terminal 5 Competition, Singapore
KLIA & KLIA2 Commercial Reset Feasibility, Kuala Lumpur, Malaysia
