

## MEP Superintendent

The **MEP Superintendent** supports the Project Manager and/or General Superintendent to ensure that company policies and procedures are followed in the field in regard to safety, quality, and customer satisfaction. The MEP Superintendent is responsible for directly managing a project's MEP construction activities to meet specifications within budgeted cost by the scheduled completion date. The MEP Superintendent may be the lead superintendent on small projects or be responsible for a specific area of a larger project.

### Key Responsibilities

- Lead design professionals and subcontractors in the development of coordinated MEPS documents necessary to graphically represent (Mechanical, Electrical, Elevators, Plumbing and Sprinkler) MEP installation.
- Coordinate and manage general conditions of work and project logistics.
- Collaborate with public utility suppliers to obtain final service connections in compliance with determined project schedule delivery date and system startups.
- Complete the technical review and approval of all MEP submittals.
- Manage MEP project closeout, ensuring all requirements are met.
- Achieve all required MEP jurisdictional inspections.
- Resolve all clash detections identified by the development of the coordination documents.
- Oversee process for state elevator inspections.
- Enforce high safety standards for MEP activities on job site.
- Inspect the quality of work for compliance with design standard and ensure corrective action occurs if/when necessary.
- Oversee all required levels of commissioning.

### Required For Success

- A college degree in Mechanical Engineering or Construction Management and 5+ years of commercial construction experience concentrated in MEP work or equivalent combination of education and experience.
- Proficient with reading, understanding, and interpreting plans, specifications, drawings, contracts, and other documents pertaining to MEP aspects of projects.
- Strong knowledge of gas installations, WSSC codes, high- and low-voltage systems, HVAC, LEED/Green Building Projects, general ground-up construction, and multi-family projects as applicable to MEP.
- Familiarity with construction management and office productivity software, including MS Excel, MS Word, MS Project, [P6](#), Procore, Timberline, or other web-based or mobile document and project management solutions.
- Able to interact and communicate professionally with all parties associated with the project. Effectively resolve or escalate issues with subcontractors and other third parties in a timely manner.
- OSHA 30, First Aid, & CPR Certification required upon hire.

## MEP Superintendent
