

The Etkin Scholars program allowed me to get more involved with many facets of the commercial real estate industry. I was able to connect with real estate professionals in the Charlotte area to learn from all of their experiences and advice, that will help me grow into my career. The many industry events throughout the school year gave me exposure to companies and professionals that I may not have had a chance to anywhere else. The program was a great learning experience to bridge a connection between the classroom and the latest CRE trends in Charlotte and around the country.

*I did not get a job through the program
