

This program has been an amazing experience for me and the other scholars that I have come to know. This program has opened the door and given all of us access to many opportunities that we would not otherwise have had. Coming from the construction industry, my school is focused alot more on other organizations and opportunities. This program has given me the opportunity to learn more about the entire industry and make connections with many people I never would have imagined. It has truly been an amazing experience for me.
