

Oren Tatcher is Principal of OTC Limited, a Hong Kong-based firm specializing in the planning and design of airports, transportation terminals and urban mobility. After receiving his Master of Architecture from Harvard University's Graduate School of Design, in 1995, he joined Skidmore, Owings & Merrill (SOM), working first in New York and, from 2003, in Hong Kong and Shanghai, where he served as the urban design studio head.

Since founding OTC in 2007, the firm has worked on airport master plans and terminals, railway stations, marine transport terminals, intermodal stations, and urban mobility solutions around the world. Current projects include new airport terminals in Hong Kong, Mexico and Switzerland; prototypes and designs for next-generation transport hubs in Singapore; a bus terminus improvement project in Hong Kong; several large intermodal hubs in Mexico City, redeveloped as PPP projects; and a large carpark project in Bangkok.

Oren has also been working closely with international NGOs and development banks to promote best practice in sustainable transport development and transportation terminal planning. He is a frequent speaker at international symposiums on public transportation and transit-oriented urban development, where he emphasizes the importance of high-quality, people-oriented and efficient mobility systems and terminals, seamlessly integrated in the urban fabric, for the well-being of cities and their residents. He is a member of the Hong Kong Institute of Urban Design and the American Institute of Architects.
