

I, Sr Dr. Lesly LAM, have been actively involving in the surveying and real estate profession for over 25 years. After serving nearly 15 years in the Hong Kong Government, I joined private sectors since 2013 and am currently a Director of Wing Tai Properties Development Limited responsible for overseeing the research and investment on assets of the Group in Hong Kong. Moreover, with regard to the professional institute and other associations, I am now a committee member of RICS HK Advisory Board, and was the Vice President, Honorary Secretary, Honorary Treasurer, Divisional Chairman of the HKIS.

Though my career and above industry-related works, I put great efforts into doing researches on HK land and housing supply, property development, asset management and smart city. The following article was one of my published opinion papers 香港居屋以負擔力定價 ---- 借鏡新加坡房屋及土地政策成功經驗 《香港經濟日報》2018 年 3 月 26 日

In the recent years, I have been working closely with my former school - the Hong Kong Polytechnic University on Common Spatial Data Infrastructure ("CSDI") for Hong Kong. CSDI has been proven in various countries to be a practicable policy on promoting "Smart City", and sustainable & green building development for the society.
