

Eri Kroh is Founder and President of Sandstone. As an experienced investor, manager and developer, his diverse portfolio includes office, retail, industrial, hotel and multi-family properties. Eri has been at the helm of Sandstone's immense growth since its founding.

A native of Israel, Mr. Kroh worked as an electronic engineer in both Israel and the United Kingdom before emigrating to the United States in 1986 where he launched a successful medical laser distribution company. Nearly a decade later, Kroh decided to reinvest the money he earned from his medtech company to pursue his passion for real estate and in 1994 he purchased Sandstone's first property. What began as a side project became his full-time focus and has since grown into a \$650MM endeavor. His innovative approach and extensive expertise in operations, leasing, finance, investment management, acquisitions, dispositions and developments have delivered solid returns for Sandstone's investors
