

Kyle Burnham is a senior preconstruction manager with Swinerton's OCLA Special Projects division. Swinerton's dynamic Special Projects divisions tackle a wide range of projects, including complex interiors, tenant improvements, adaptive reuse, and seismic retrofitting jobs. Kyle started his career with Swinerton in 2010 and has contributed on a variety of public and private projects in both an operational and preconstruction capacity. Since 2016, Kyle plays a key role and actively manages Swinerton's portfolio of adaptive reuse / retrofit work in the greater Los Angeles / Orange County regions with a renewed focus on the preconstruction efforts leading up to the successful development of these projects. Kyle holds Bachelor and Master of Science in Civil Engineering degrees from the University of Southern California. Kyle is a registered professional civil engineer in California.
