

Erin McConahey

Principal, ARUP

Erin has degrees in both mechanical and structural engineering and has experiencing working on projects ranging from museums to airports, schools to laboratories. As a Principal in Arup's Los Angeles office, she has been responsible for the design leadership of many of the firm's most significant projects.

Erin's extensive technical knowledge of innovative and energy saving solutions is coupled with her commitment to sustainable designs that address the whole life cycle of buildings. She brings a sophisticated understanding of balancing mechanical system and façade options in order to predict and maximize energy savings at early phases in a project. Erin recently attained the rare distinction of ASHRAE Fellow in recognition of her significant contributions to the industry.

Erin is an Arup Fellow.
