Senior Project Engineer – Civil Site Design

The ideal candidate shall have 5-10 years' experience as Professional Engineer with specialty in Civil Site design with current Professional Engineers license or ability to renew license in the State of Florida within 6 months. The Project Engineer will provide the backbone of design efforts and will coordinate directly with the Contract Manager for proper allocation of company resources to ensure timely completion of all activities and deliverables during the various stages of multidisciplinary design projects. The projects may vary in size and nature.

Education/Experience/Licenses:

- Bachelor's degree in Civil Engineering from ABET accredited university required
- Florida Professional Engineers license required (or ability to obtain within six months)
- Experience in preparation of Stormwater model and Hydraulic Grade Line Calculations
- Experience in Lift station/pump design
- Experience in Pressurized water main design and flow analysis

Skills and Special Requirements:

- Extremely strong collaboration and communication skills
- Strong organizational skills
- Strong project management and time management skills
- Ability to oversee numerous projects efficiently and effectively
- Proficient in Microsoft applications including Outlook, Word and Excel
- Strong background in Project Planning and Leadership
- Analyzing and evaluating various water resource related technical problems to improve the performance of stormwater systems
- Knowledge and experience of the hydrologic and hydraulic principles associated with culvert systems knowledge and experience with roadway drainage, stormwater, sedimentation and erosion control, civil site development, and/or watershed modeling a plus
